1. Aims

This policy aims to ensure that:

- Pupils, staff and parents understand how our school will support pupils with medical conditions
- Pupils with medical conditions are properly supported to allow them to access the same education as other pupils, including school trips and sporting activities

The individual Advisory Body will implement this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of pupil's condition, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions
- Providing supply teachers with appropriate information about the policy and relevant pupils
- Developing and monitoring individual healthcare plans (IHPs)

The named person with responsibility for implementing this policy is the Headteacher

2. Legislation and statutory responsibilities

This policy meets the requirements under Section 100 of the Children and Families Act 2014, which places a duty on governing boards to make arrangements for supporting pupils at their school with medical conditions.

It is also based on the Department for Education's statutory guidance: Supporting pupils at school with medical conditions.

3. Roles and responsibilities

3.1 The Advisory Body

Each primary school Advisory Body has ultimate responsibility to make arrangements to support pupils with medical conditions. The Advisory Body will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions.

3.2 The Headteacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation.
- Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations.
- Take overall responsibility for the development of IHPs.
- Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way.
- Contact the school nursing service in the case of any pupil who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse.
- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date.

3.3 School Admin Staff will:

- Ensure that all data collection received from parents is entered into Sims accurately.
- Ensure that the IHP register is accurate and kept up to date and IHPs are scanned into Sims, including annual reviews.
- Ensure that parents have completed consent forms accurately when handing medication into the school office.
- Update at least annually, or as required a class list with photographs identifying Medical Conditions and dietary requirements.
- Brief supply teachers about the pupil, the medical condition and how the school supports that pupil.

3.4 The pupil's class teacher will:

- Develop and monitor the child's IHP in conjunction with parents and other staff as appropriate and review the IHP at transition stages e.g. when the child moves to another class.
- Risk assess school visits and other activities outside the normal school timetable, considering the pupil's medical condition and the specific support required.

3.5 Teachers & Support Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

A key worker will be assigned to each child ensuring that medication and consent forms are up to date as well as notifying the school office of any changes.

Staff will notify the school office when a child is newly diagnosed with a medical condition or an existing condition is updated.

The identified keyworker will ask parents to check medication is correct and in date at the end of every term. Any unused medication that has expired will be sent home with parents.

3.6 Parents

Parents will:

- Provide the school with sufficient and up-to-date information about their child's medical needs.
- Be involved in the development and review of their child's IHP, they may be asked to draft the plan and then meet with staff to discuss.
- Carry out any action they have agreed to as part of the implementation of the IHP.
- Provide medicines and equipment.

3.7 Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

3.8 School nurses and other healthcare professionals

School nursing service will notify the school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts school, wherever possible.

Healthcare professionals, such as GPs and paediatricians, will liaise with the school's nurses and notify them of any pupils identified as having a medical condition.

4. Equal opportunities

Our school is clear about the need to actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

5. Being notified that a child has a medical condition

When the school is notified that a pupil has a medical condition, the process will be followed to decide whether the pupil requires an IHP. **See Appendix 1- Process for developing Individual Healthcare Plans**

The school will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for pupils who are new to our school. All relevant paper work will be sent to parents in order to prepare for a meeting to develop the IHP.

See Appendix 2: model letter inviting parents to contribute to individual healthcare plan development

6. Individual Healthcare Plans

The Headteacher has overall responsibility for the development of IHPs for pupils with medical conditions. While the Headteacher has overall responsibility, the development of IHPs for pupils is delegated to the classteacher or TA identified as the child's keyworker. The office will manage the whole school register of IHPs. **See Appendix 3**

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

- What needs to be done
- When
- By whom

All children with medication in school will have an IHP. Some children with specific medical conditions will have been provided with an individual emergency procedure plan by their GP or hospital. Where these are provided they will form the IHP.

Plans will be drawn up in partnership with the school, parents and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs where necessary. The pupil will be involved wherever appropriate.

See Appendix 4: School: Individual Healthcare Plan

IHPs will be linked to, or become part of, any statement of special educational needs (SEN) or education, health and care (EHC) plan. If a pupil has SEN but does not have a statement or EHC plan, the SEN will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The Advisory Body, headteacher and Keyworker, will consider the following when deciding what information to record on IHPs:

- The medical condition, its triggers, signs, symptoms and treatments.
- The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons.
- Specific support for the pupil's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions.
- The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring.
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable.
- Who in the school needs to be aware of the pupil's condition and the support required.
- Arrangements for written permission from parents and the Headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours.
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments.
- Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition.
- What to do in an emergency, including who to contact, and contingency arrangements.

7. Managing medicines

All medicines must be handed in at the school office. Prescription medicines will only be administered at school:

➤ When it would be detrimental to the pupil's health or school attendance not to do so **and**

where we have parents' written consent

There are two types of medical consent

- **Long-Term Conditions – Appendix 5**
Parental agreement for school to administer medication- Child with Individual Healthcare Plan (IHP)- ***regular medicines such as epipens, asthma inhalers.***
- **Short-term Conditions- Appendix 6**
Record of medicine administered to an individual child without IHP eg course of antibiotics

Anyone giving a pupil any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents will always be informed. Staff must record the date, time and dose given to the child. Appendix 5 & 6

The school will only accept prescribed medicines that are:

- In-date
- Labelled with pharmacy label
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and not locked away.

Medicines will be returned to parents to arrange for safe disposal when no longer required.

EMERGENCY ADRENALINE PEN AND SALBUTOMOL INHALER

The school office holds an emergency salbutamol inhaler, in accordance with 2015 'Guidance on the use of emergency salbutamol inhalers in schools' this should only be used by pupils, for whom written parental consent for use of the emergency inhaler has been given, who have either been diagnosed with asthma and prescribed an inhaler, or who have been prescribed an inhaler as reliever medication.

The school office holds an emergency Adrenaline Pen. In accordance with 2017 'Guidance on the use of adrenaline auto-injectors in schools', this can be administered without prescription in an emergency, but only to a pupil at risk of anaphylaxis, where both medical authorisation and written parental consent for use of the spare AAI has been provided.

See Appendix 7: Emergency Salbutamol & Adrenaline Pen Permissions

See Appendix 10: Register of consent for Emergency Salbutamol & Adrenaline Auto Injector

See Appendix 11- Recording use of Emergency Salbutamol

7.1 Controlled drugs

Controlled drugs are prescription medicines that are controlled under the Misuse of Drugs Regulations 2001 and subsequent amendments, such as morphine or methadone.

A pupil who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another pupil to use. All other controlled drugs are kept in a secure cupboard in the school office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

7.2 Pupils managing their own needs

Pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents and it will be reflected in their IHPs.

Pupils will be allowed to carry their own medicines and relevant devices wherever possible. Staff will not force a pupil to take a medicine or carry out a necessary procedure if they refuse, but will follow the procedure agreed in the IHP and inform parents so that an alternative option can be considered, if necessary.

7.3 Unacceptable practice

School staff should use their discretion and judge each case individually with reference to the pupil's IHP, but it is generally not acceptable to:

- Prevent pupils from easily accessing their inhalers and medication, and administering their medication when and where necessary.
- Assume that every pupil with the same condition requires the same treatment.
- Ignore the views of the pupil or their parents.
- Ignore medical evidence or opinion (although this may be challenged).
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs.
- If the pupil becomes ill, send them to the school office unaccompanied or with someone unsuitable.
- Penalise pupils for their attendance record if their absences are related to their medical condition, e.g. hospital appointments.
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively.
- Require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their pupil, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs.
- Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of school life, including school trips, e.g. by requiring parents to accompany their child.
- Administer, or ask pupils to administer, medicine in school toilets.

8. Emergency procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent arrives, or accompany the pupil to hospital by ambulance. **See Appendix 8**

9. Training

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the headteacher. Training will be kept up to date and will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils

- Fulfil the requirements in the IHPs
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication. **See Appendix 9 – Staff Training**

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative and emergency measures so they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

10. Record keeping

The Advisory board will ensure that written records are kept of all medicine administered to pupils for as long as those children are pupils at the school as explained by the Department for Education (DfE).

Parents will be informed if their pupil has been unwell at school.

All medication consent forms and IHPs will be kept in the school office accessible to all staff throughout the day, copies will be kept in the classroom with medication. IHPs are kept in a readily accessible place which all staff are aware of.

11. Liability and indemnity

The governing board will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk. Staploe Education Trust is a member of the Department for Education's risk protection arrangement (RPA).

Our insurers will provide indemnity if a Member became legally liable to pay for damages or compensation in respect of or arising out of personal injury occurring in connection with the provision of medicines or medical procedures. Indemnity will also be provided to any member of staff (other than any doctor, surgeon or dentist while working in a professional capacity) who is providing support to pupils with medical conditions and has received sufficient and suitable training.

Full written policy documents are available to be viewed by members of staff who are providing support to students with medical conditions. Please contact Staploe Education Trust's Operations Director if required.

12. Complaints

Parents with a complaint about their child's medical condition should discuss these directly with the headteacher in the first instance. If the headteacher cannot resolve the matter, they will direct parents to the school's complaints procedure.

13. Monitoring arrangements

This policy will be reviewed and approved by the Advisory Body every year.

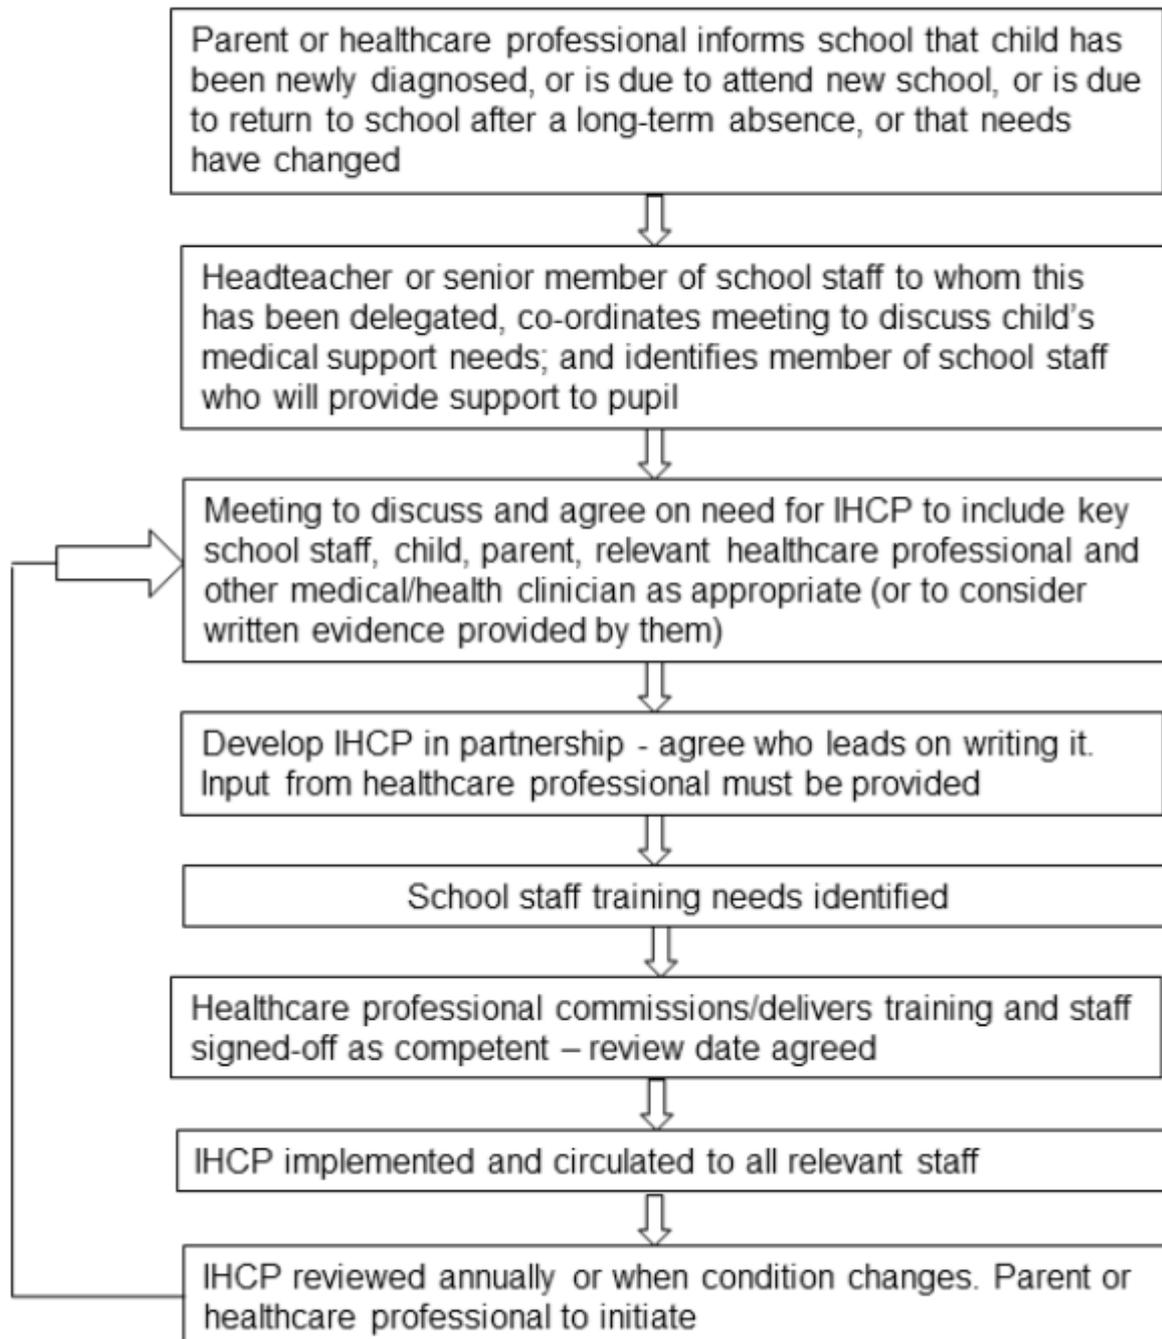

14. Links to other policies

This policy links to the following policies:

- Accessibility Plan
- Complaints Policy
- Equality information and objectives
- First Aid Policy
- Health and Safety Policy

- Safeguarding & Child Protection Policy
- Special Educational Needs Policy

Appendix 1: Process for Developing Individual Healthcare Plans

Appendix 2: Model letter inviting parents to contribute to individual healthcare plan development

Dear Parent

MEDICAL CONDITIONS: DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD

We are currently reviewing our policy and procedures for children with Medical Conditions. According to our records your child has a medical condition that requires medication to be held in school. Please see our school website for a copy of the policy.

A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support each pupil needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, pupils, and where necessary the relevant healthcare professional who can advise on your child's case. You may already have a hospital plan that has been written specifically for your child, this can be used to inform the IHP.

The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. It is essential that the information we hold is detailed and up to date.

- Please could you ensure the enclosed data collection sheet is updated and all medical conditions and contact details are correct.
- Please complete a draft of the IHP and ready to discuss with your child's keyworker. This can be emailed in preparation to the school office.
- Please give consent for the school adrenaline pen / salbutamol inhaler to be used in an emergency.

This does not replace the need for parents to supply medication in school.

The meeting will be arranged and held with your child's keyworker over a Microsoft Teams Meeting. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

Kind regards

Headteacher

Appendix 7 Emergency Salbutamol & Adrenaline Pen Permissions

NOTIFYING PARENTS OF EMERGENCY SALBUTAMOL INHALER USE

Child's name:

Class:

Date and time:

Dear Parent

This letter is to formally notify you that.....has had problems with his / her

breathing today. This happened

when.....

They did not have their own asthma inhaler with them, so a member of staff helped them to use the emergency asthma inhaler containing salbutamol. They were given puffs.

Their own asthma inhaler was not working, so a member of staff helped them to use the emergency asthma inhaler containing salbutamol. They were given puffs. .

Although they soon felt better, we would strongly advise that you have your seen by your own doctor as soon as possible.

Yours sincerely,

[Name of School]

PERMISSION FOR USE OF EMERGENCY SALBUTAMOL INHALER [Name of School]

Child showing symptoms of asthma / having asthma attack

1. I can confirm that my child has been diagnosed with asthma / has been prescribed an inhaler [delete as appropriate].
2. My child has a working, in-date inhaler, clearly labelled with their name, which they will bring with them to school every day.
3. In the event of my child displaying symptoms of asthma, and if their inhaler is not available or is unusable, I consent for my child to receive salbutamol from an emergency inhaler held by the school for such emergencies.
